

Seasol[®]

Commercial Seaweed
Concentrate

Seasol is a 100% liquid seaweed plant conditioner that provides a synergistic range of natural compounds, trace elements, alginates and carbohydrates from a blend of brown kelps.

Seasol is a natural seaweed plant stimulant that works by making plants healthier. It has an amazing effect on root growth, reduces plant stress and is safe to use on any plant at any time of year.

Seasol is a natural product so has no with-holding period or field re-entry restrictions. **Seasol** also has the effect of enhancing fertiliser efficiency by stimulating root growth and plant activity.

Seasol[®]

Commercial Seaweed Concentrate

Our seaweed is not harvested from living stands, but sustainably sourced from storm-cast material collected from remote locations that are free from pollution. This ensures the highest possible quality and consistency in every drum.

Seasol is a plant stimulant used to boost plant metabolism. It is 100% soluble and can be applied either to the soil or the foliage. It is designed to provide benefits that complement your existing fertiliser program. These benefits result from a general increase in overall plant health.

Features & Benefits:

- ✓ Helps plant establishment and reduces transplanting shock
- ✓ Stimulates growth of white root and enhances flowering
- ✓ Enhances soil microbial activity
- ✓ Increases stress tolerance against biotic and abiotic conditions

How it works?

Seasol is a complete plant health treatment that contains a synergistic range of natural compounds, trace elements, alginates and other bio-active compounds that help to promote healthy roots, encourage beneficial soil micro-organisms, stimulate flowering and fruiting and help plants to cope with heat, drought and cold stress.
